Mechanicam vero duplicem Veteres constituerunt: Rationalem *quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique* Mechanica *nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut* Mechanica *omnis a* Geometria *ita distinguatur, ut quicquid accuratum sit ad* Geometriam *referatur, quicquid minus accuratum ad* Mechanicam. *Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.* NEWTON

La généralité que j'embrasse, au lieu d'éblouïr nos lumieres, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité. EULER

... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum. LEIBNIZ

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding and excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 34

BAOUENDI, M. S., & C. GOULAOUIC, Régularité et Théorie Spectrale pour Une Classe d'Opérateurs Elliptiques Dégénérés 361

BOHL, E., Iteration und Fehlerabschätzung in Räumen mit einem archimedischen Kegel 354

BOWEN, R. M., The Thermochemistry of a Reacting Mixture of Elastic Materials with Diffusion 97

CARROLL, M. M., Controllable Motions of Incompressible Non-simple Materials 128

CRUZ, M. A., see HALE, J. K. 331

DAY, W. A., A Theory of Thermodynamics for Materials with Memory . . 85

DI PRIMA, R. C., & G. J. HABETLER, A Completeness Theorem for Non-selfadjoint Eigenvalue Problems in Hydrodynamic Stability 218

EDELEN, D. G. B., Protoelastic Bodies with Large Deformation 283

FRIEDMAN, A., Linear-Quadratic Differential Games with Non-zero Sum and with N Players. 165

GEIRINGER, H., Probability Theory of Verifiable Events 3
